DETAILED ACTION

Applicant's response to restriction requirement dated April 8, 2003 has been considered, however, arguments to claim 12 are inaccurate. Applicant relied on an error of lack antecedent basis of claim 12, claim 1 does not recite an outer body, therefore, claim 12 cannot depend on claim 1 but rather on claim 10. A new restriction is hereby modified.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, 11 and 13, drawn to an ion generator, classified in class 607, subclass 79.
- II. Claims 10, 12, 14-21, drawn to an electric hairbrush, classified in class 132, subclass 271.

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the ion generator in group II does not require the ground electrode is disposed so as to surround an imaginary extension

of a longitudinal axis of the needle electrode and has a portion thereof depleted to provide a split region. The subcombination has separate utility such as the ion generator in group I can be used with an air-cleaning device rather than with a brush.
